

Week goals:

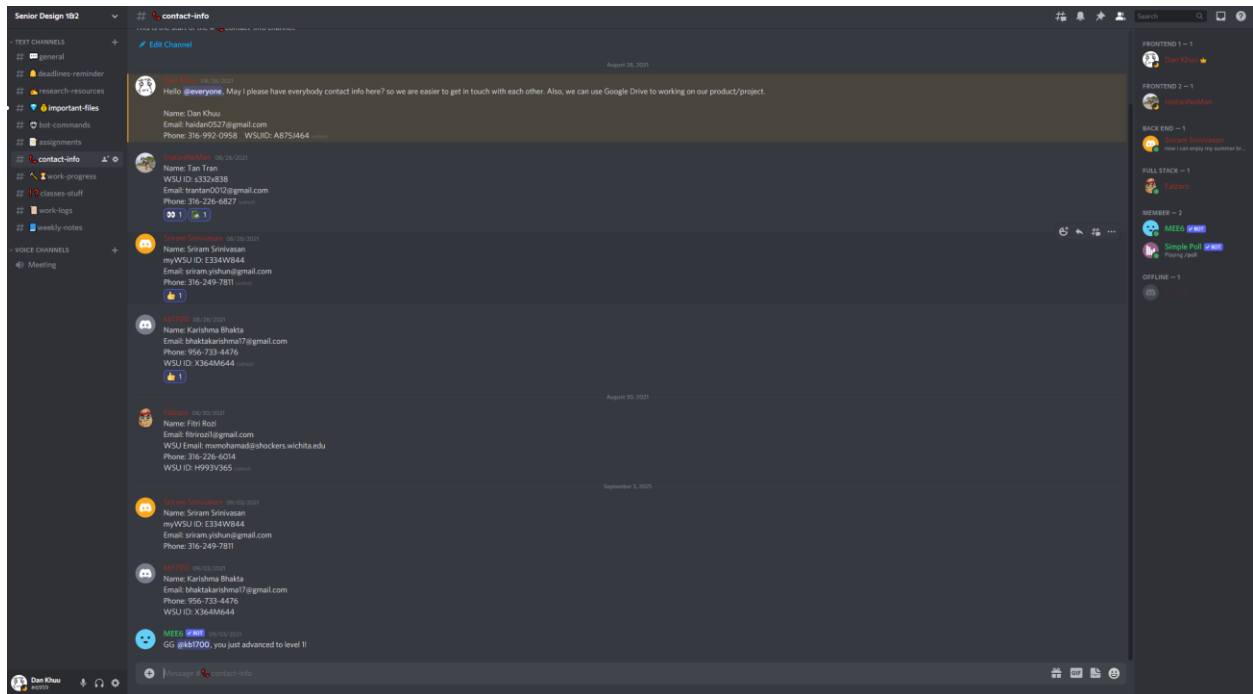

The goal for this week is to gathering others as a team and discuss with professor about our project and waiting for approval. Discussing with team for next week assignment and plans.

Work notes:

Our team meeting up and asking questions and discussing some of the problem that we might run into while creating the project. Making sure that our team able to answer all of team members questions or discussions.

Workplace:

As together I setup a working environment to keeping track of all the works that had done and will be done. We use Discord as a platform to work and communicate with each other person within our team. Everyone was agreeing to choose Discord as our workplace and meeting. We all together build a discord channel. I created tabs and channels and test out if they all work or is there any errors while using tabs and channel. As the following picture is our team workplace.

Sharing files and working together:

Our first challenge is finding out a way that can work together and everyone can access into which is to fix and add notes and work steps. Therefore, Google Drive is our best solution and its friendly user, everyone can be catching up to use Google Drive if never had use it before. Everyone uploads assignment files to Google Drive and access into there and can work together. Also, our team come up with rule while using Google Drive is that if deleting or adding anything make sure to notice everyone on Discord to making sure that everyone knows what happening.
