

Week goals:

This week goal is to be having another meeting with the Tabor College IT Team to keep them up to date with what our team doing and create a schedule plan for our project.

Work notes:

For the inconvenience of the network down from Tabor College IT Team so both of the team got cancel with the meeting. Instead of not having the meeting, me and Tan meeting up and working on the Project Planning Schedule. The Planning Schedule is pretty much done and ready to show/present to Tabor College sponsor.

Workplace:

Our team is okay to use Microsoft Project for the Planning Schedule. Before, I was having struggle to using it. Tan was help me download and redeem the code through Azure Portal. He walks me through MS Project then we all together finish the Project Planning. I also having issue with Figma platform. For some reason, my Figma forum is really lag and bug. I could not help our team. I end up have to draw on my note then posted my notes to one of the teammates to help me export to Figma. But finally, my issues got solve because I contact the customer support.

Goal for next week:

Goal for this week is creating a draft for our wireframe and make it presentable to show to Tabor College Sponsor so help them up to date what is our team doing.
