Week 13 -- 11/8/21-11/14/21

Goal of the Week:

       The goal for this week was to get started on our mockup, create E/R diagrams and schemas, and research for our individual parts. We also planned on brainstorming ideas for our showcase on December 3, 2021.

General Note:

       The team met up on Friday November 14, 2021, at 7:00PM. We started out by discussing what each team member had accomplished for the week and what they will be doing for the upcoming week. We then discussed that we would need to ask the IT team at Tabor about how we will identify who is an admin or a student. We also discussed how we would be presenting for our showcase.

Results and Conclusions:

       We concluded that the difference between an admin and a student would be that the admin can push out notifications while students can view notifications. We discussed and decided that Fitri would get the setup of the video started, and everyone can send him ideas they may have for the video. We also decided that since Karishma was the team lead, she can make a layout of how she wants the table at the showcase to look like. We also felt it was time to make another appointment with the sponsors so Karishma said she would email Zack and get a date and time for the upcoming week, if possible. We wrote up everyone's tasks on Trello so everyone can see what needs to be done.

Next Steps:

We plan on sharing ideas with Fitri for the showcase video by Wednesday. We will also complete our individual tasks and report to our team within a week, and if more time is needed, we will let the team know. We also plan on working towards getting our showcase ready.
